The Director

Dear Sir / Madam,

The Patna Management Association (PMA) is providing online programmes for "skill development with industry experience" for engineering students, management students, graduates, and entrepreneurs, in collaboration with AB Unites Technologies Bangalore. **Please visit their website (<https://abunitestech.com>)**

The programmes will help aspirants develop their skills with industry experience and build a workforce that will perform the roles as assigned. I have attached the technical write-ups on our programmes.

The PMA has an event planned for interactive sessions with the ABUnites team in January/2023. We wish to invite the faculties of the engineering and management departments. Feb

We will confirm the venue, date, and time of the event shortly.

Thank you and request for your support, in the above context.

Best Regards,

B. K. Sinha

What is a value-based programme?

The value-based programme helps aspirants develop their **core skills** so they will perform and achieve role-based KPIs as assigned. Students will enroll in this programme in one of two ways: semester by semester or intensively. The programme is executed and delivered in stages 1 and 2 by industry experts, technology experts, and senior IT professionals. **Healthcare, Industry 4.0, and Pharma 4.0 are the current focus industries.**

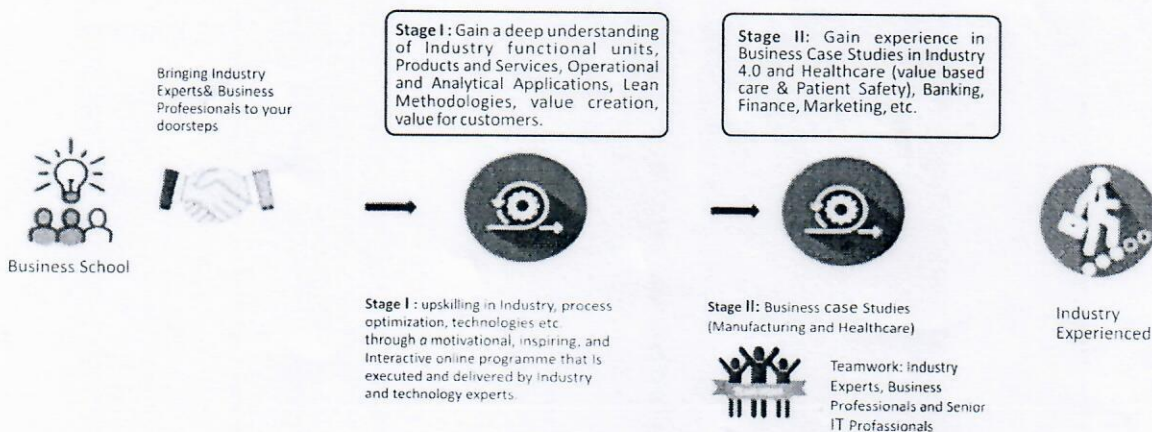

value-based for engineering students

The programme will help participants develop "**full stack developer skills,**" which include front-end developer and back-end developer skills in **MERN and MEAN tech stacks**, experience with **DevOps CI and CD tools and Cloud Services**, a deep understanding of the application design and MVC architecture, and Agile [SCRUM] methodology.

value-based for business students

The programme will help participants develop *their business skills, management skills, delivery skills, functional skills, technical skills, and analytical skills*
